Ministry of Science & Technology,
Ministry of Earth Sciences,
Minister of State, Prime Minister's Office,
Ministry of Personnel, Public Grievances and Pensions,
Department of Atomic Energy & Department of Space,
Government of India

It gives me immense pleasure to release the first District Good Governance Index for Jammu and Kashmir. Since the formation of Jammu & Kashmir as Union Territory (UT), the Central Government and UT Administration, in tandem, are directing all their efforts to enhance ease-of-living and holistic development of the region. There has been a sincere attempt to change the work culture and to follow the mantra of "Maximum Governance, Minimum Government".

District being a basic unit of field administration and governance, implementing various programmes and innovative projects for the well-being of citizens, its performance on various governance indicators must be measured to attest the development. Good Governance Index at the District-level will enable each of the 20 districts of Jammu & Kashmir to rise to the level of the best administered districts of the country.

The efforts of the Jammu & Kashmir Administration are laudable in actualising the District Good Governance Index for Jammu & Kashmir, which is the first of its kind for any State/UT in the country. I congratulate Shri V. Srinivas, IAS, Secretary, Department of Administrative Reforms and Public Grievances (DARPG), Government of India for taking lead and guiding the entire process.

LIEUTENANT GOVERNOR
JAMMU & KASHMIR

RAJ BHAVAN
JAMMU-180001

The J&K UT Administration has developed a fast track mechanism to change the work culture and to follow the mantra of "**Maximum Governance Minimum Government**".

Since the formation of Jammu & Kashmir as a Union Territory, the Centre Government and J&K UT Administration in tandem are using all their efforts to enhance the ease of living and holistic development of the region.

J&K UT is adopting District Good Governance Index, which is for the first time launched in all the 20 districts of J&K, with the aim to judge the performance of each district in different areas, schemes, programmes announced by the Government from time to time for the well-being of people, and give opportunity to each district to rise to the level of some of the best administered districts of the country.

I appreciate the efforts of Institute of Management, Public Administration and Rural Development for taking lead in making the District Good Governance Index a success.

MESSAGE

Benchmarking Governance represents Next Generation Administrative Reforms during the Amrit Kaal period. The Department of Administrative Reforms and Public Grievances has published the Good Governance Index (GGI) 2021 as a tool to assess the status of governance and impact of various interventions taken up by the Central and State Governments including UTs. Taking it to the next level, District Good Governance Index is modelled on the Good Governance Index 2021 launched on 25 December 2021. The indicators have been revised to make the Index region specific, assessing the ground realities and meeting the aspirations of the people. The UT Government of Jammu & Kashmir, the IMPARD and District Collectors of J&K have played critical roles in the development of the Index, in the selection of indicators and collation of authentic data.

The ranking of the Districts of the Union Territory of J&K would bring about healthy competition amongst Districts from which the citizens would be immensely benefitted. The DGGI ranks Districts in ten different Sectors. Extensive consultations in finalising the sectors and indicators were taken up ensuring participation of senior officials and Deputy Commissioners of all the Districts. This initiative is first of its kind. Districts would leverage the DGGI to make improvements in different areas to of governance.

The support received from Shri Arun Kumar Mehta, Chief Secretary, J&K enabled the development of the Index in a short span of 4 months. The efforts of DG, IMPARD, DG J&K Economics and Statistics and Director, Centre for Good Governance (CGG), Hyderabad in preparation of this Index are praiseworthy.

(V Srinivas)

Message

It gives me immense pleasure to know that the Institute of Management and Public Administration, and Rural Development is releasing the first District Good Governance Index of Jammu and Kashmir. The new Index has been conceptualized to promote healthy competition among all the districts.

Government of Union Territory of Jammu and Kashmir is committed to a holistic approach to Good Governance. It has taken a number of steps in this direction such as unprecedented transparency in financial management, enhanced use of Information Technology, outcome orientation, democratic decentralization through setting up of three tier Panchayati Raj Institutions for the first time in the history of Jammu and Kashmir, etc. The District Good Governance index is an another milestone in this direction and it is expected that it will provide a much needed robust framework for evidence based assessment of the performance of all the Districts of the Union Territory of Jammu and Kashmir.

A district is the primary unit of field administration, engaged in the implementation of various welfare schemes and developmental programmes. The new District Good Governance Index will quantify the performance of all 20 districts of Jammu and Kashmir under respective sectors and will allow them to identify and suitably plug the local governance gaps to ensure their holistic development.

This initiative is the first of its kind in the country and I am confident that our districts will leverage the opportunity to improve their performances not only among the districts of J&K but also in comparison to other districts from all over India.

The efforts of the joint team of the J&K IMPARD, Economics & Statistics Department, and CGG, Hyderabad in formulation of this Index is praise worthy. I am also grateful to the Department of Administrative Reforms and Public Grievances, Government of India for their active support. I also urge all district administrations to use comparative analysis to improve their performances.

MESSAGE

Governance has been assessed by a host of organisation in different ways and through various parameters. The Department of Administrative Reforms and Public Grievances (DARPG) is supporting Government of Jammu & Kashmir to come up with a District-level rankings on the lines of Good Governance Index released by the Department. The District Good Governance Index (DGGI) of Jammu & Kashmir aims to quickly and effectively transform all the 20 Districts.

DGGI focuses on the strength of each District, identifying strong and weak areas for immediate improvement and measuring progress by ranking the Districts. For the purpose, 10 Governance Sectors and 58 Indicators have been finalised after detailed consultation with stakeholders. It is envisaged that it will support the District Administrations in raising the living standards of its citizens and ensuring inclusive growth for all.

The support and guidance extended by the Shri V. Srinivas, IAS, Secretary, DARPG has lead to development of DGGI. The keen interest taken up by the Chief Secretary to Government of J&K and his inputs helped the DGGI to take a comprehensive shape. The efforts of J&K IMPARD, Directorate of Economic and Statistics, J&K and Centre for Good Governance (CGG), Hyderabad in preparation of this Index are vital for preparation of DGGI.

MESSAGE

The formulation of DGGI is a pioneering and novel effort of the Government by which Jammu & Kashmir has attained the distinction of being the first Union Territory in India to adopt this under the aegis of Department of Administrative Reforms, Public Grievances and Pensions, Government of India. In Jammu & Kashmir, the data on 10 Sectors 58 indicators and 116 data sets was collected to assess the comparative performance of all the 20 districts. It was a process of comparing through a data driven platform, the quality of governance in districts though they are economically, socially, and culturally diverse and different.

I trust that the formulation of DGGI on empirical data and evidence based approach for measuring performance, will assist the government in addressing specific gaps through a dynamic process of assigning of weights and ranking to foster healthy competition among districts. It will immensely add value to decision making, allocation of resources and design of policies and programmes of the government. By making the DGGI an annual feature and a move towards sustainable data collection protocol, it is hoped that the base line data developed will assist in bridging the performance gaps while keeping the real-time check on the credibility, quality and outreach of governance to the citizenry.

I place my gratitude to Hon'ble MoS, PMO Shri Jitendra Singh Ji, Hon'ble Lt. Governor Shri Manoj Sinha and Secretary DARPG Shri V. Srinivas who not only initiated the DGGI but also constantly provide leadership and guidance for its development. Centre for Good Governance, Hyderabad played a major role as consultant and technical partner for DARPG and J&K IMPARD.

I also place my gratitude to worthy Chief Secretary Shri Arun Kumar Mehta for initiation of the process by stressing the need of a Good Governance Index and regularly followed up the progress of development of DGGI.

It is also placed on record the cooperation of DDC's, DSEO's and Director General E&S and Director Trainings, IMPARD Jammu for providing much needed data sets to create and run the Mathematical Model for the Index

DGGI shall be used as an innovative tool for measuring performance of districts and also niche sectors. This shall help the UT in perspective planning, the developmental gaps thus shall be identified and funding anomalies can be corrected.

Saurabh Bhagat, IAS
Director General,
J&K IMPARD
(Commissioner/Secretary to
Government of J&K)

Acknowledgement

We are thankful to Shri V. Srinivas, IAS, Secretary, Department of Administrative Reforms and Public Grievances (DARPG), Government of India for the support he provided with valuable inputs, insights and encouragement for developing a comprehensive and robust District Good Governance Index (DGGI) of J&K.

We sincerely appreciate the support received from Shri Arun Kumar Mehta, IAS, Chief Secretary to Government of Jammu & Kashmir at every step of developing of DGGI. Support received from Shri N.B.S. Rajput, IAS, Joint Secretary, DARPG is of immense value.

It is also to acknowledge the support and inputs provided by the representatives of various Dept. of Government of Jammu & Kashmir. We particularly appreciate the support and inputs received from Deputy Commissioners of the Districts and sparing their time during virtual meetings while brining out the DGGI.

The support received from Shri Saurabh Bhagat, IAS, Director General, J&K IMPARD is gratefully acknowledged. The support received from Dr. Reva Sharma, Director Training, J&K IMPARD is dully acknowledged. Their technical inputs on every aspect of Index and particularly the coordination support has been instrumental. A special thanks goes to Smt. Satvir Kour Sudan, Director General, Directorate of Economics and Statistics, Government of Jammu and Kashmir and her team to compile the required data from all Districts within a very short period of time. Their suggestion on data availability has helped in finalising the indicators.

We also acknowledge the support received from Prof. Poonam Singh, National Centre for Good Governance (NCGG). We would like to put on records the crucial support provided by the team at DARPG comprising Smt. Prisca Mathew, Deputy Secretary and Shri Rakesh Chandra, Under Secretary.

The DGGI is collective efforts of the CGG's design and development team, who ungrudgingly extended their support and help in designing the index and preparation of the report. The relentless support and guidance of Shri Rajendra Nimje, ex-IAS, Director General, CGG is acknowledged. Sincere appreciation to CGG team especially Shri Shabbeer Shaikh, Director, CGG supported by Smt. Hijam Eskoni Devi and Shri Vaibhav Purandare, Programme Managers, CGG who shouldered the responsibility of data collation, estimation, visualisation at all levels and development of the Report. Support extended by Shri D. Bhanuprakash and Shri Manishankar Madishetty, Knowledge Managers, CGG is also acknowledged.

Executive Summary

Good Governance is a very important factor in promoting a holistic development. Districts being a basic unit of field administration and governance, implementing various programmes and innovative projects for the well-being of citizens, measuring their performance becomes important for proper assessment and planning which will lead to the development of the Districts and the region as a whole.

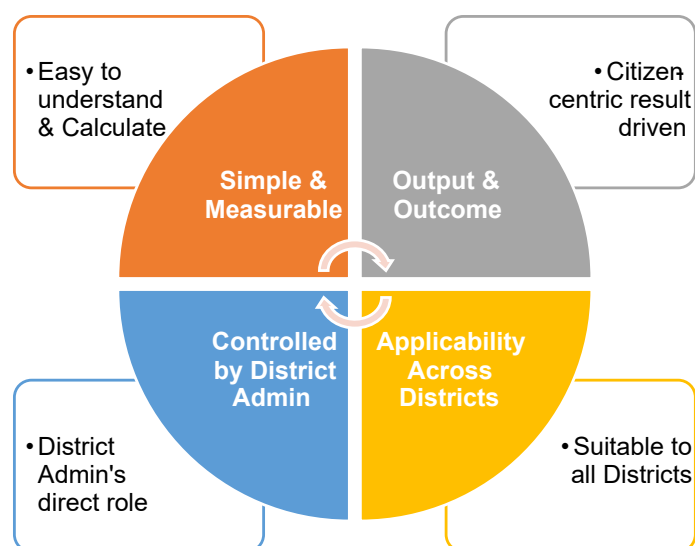

The District Good Governance Index (DGGI) is aimed to assess the state of governance in all 20 Districts of Jammu and Kashmir based on certain Sectors and selected Indicators. It will enable ranking of Districts and present a comparative picture. The ranking would bring about healthy competition amongst Districts in the quest to provide citizen centric administration and governance. This DGGI is expected to provide guidance to the UT & District Administration of J&K and other stakeholders in their efforts to address existing gaps, plan to bridge these gaps and aid as decision making tool.

DGGI is modelled on the Good Governance Index (GGI) 2021 with revision in the indicators to make it more region specific, assessing the ground reality and meeting the aspiration of the people. Extensive consultations in finalising the sectors and indicators were taken up ensuring participation of senior officials and Deputy Commissioners of all the Districts.

The components of the DGGI are:

The principles of Indicator Selection are:

The DGGI of J&K encompasses 10 Governance Sectors and 58 Indicators with 116 data items.

#	Sectors	No. of Indicators
1	Agriculture & Allied	11
2	Commerce & Industry	05
3	Human Resource Development	09
4	Public Health	09
5	Public Infrastructure & Utilities	06
6	Social Welfare & Development	06
7	Financial Inclusion	03
8	Judiciary & Public Safety	04
9	Environment	02
10	Citizen Centric Governance	03
	Total	58

The data is sourced from the Directorate of Economics and Statistics (DES), Govt. of J&K. The raw data is normalised using Dimensional Index Method and used for ranking purpose after applying the respective weightages assigned to the indicators. Sectors carry equal weights as all sectors are essential for an overall development of a region/District. Scores of indicators are aggregated to arrive at the Sector Score and thereby arriving at a Sector Rank. Sector Scores are aggregated for calculating the Composite District Rank.

While the report has detailed presentation on the scores and corresponding ranks of each District, following is the Sector-wise List of top three Districts:

#	Sectors	Top Ranking Districts		
		1	2	3
1	Agriculture & Allied	Kishtwar	Srinagar	Doda
2	Commerce & Industry	Jammu	Ramban	Kupwara
3	Human Resource Development	Pulwama	Ganderbal	Samba
4	Public Health	Reasi	Jammu	Srinagar
5	Public Infrastructure & Utilities	Srinagar	Jammu	Samba
6	Social Welfare & Development	Ramban	Kathua	Anantnag
7	Financial Inclusion	Ganderbal	Kulgam	Anantnag
8	Judiciary & Public Safety	Doda	Udhampur	Rajouri
9	Environment	Shopian	Doda	Budgam
10	Citizen Centric Governance	Jammu	Kishtwar	Srinagar

The sector-wise scores attained by the Districts indicates strong performance by them in one or the other sector. Analysis of scoring also suggests that there is a very marginal difference among the Districts in their composite governance scores.

The composite Ranking of DGGI is as follow:

Rank	Composite Ranks		Rank	Division-wise Rank
1	Jammu	Jammu Division	1	Jammu
2	Doda		2	Doda
3	Samba		3	Samba
4	Pulwama		4	Kathua
5	Srinagar		5	Kishtwar
6	Ganderbal		6	Udhampur
7	Anantnag		7	Reasi
8	Baramula		8	Ramban
9	Kathua		9	Poonch
10	Kupwara		10	Rajouri
11	Kishtwar	Kashmir Division	1	Pulwama
12	Badgam		2	Srinagar
13	Udhampur		3	Ganderbal
14	Reasi		4	Anantnag
15	Bandipora		5	Baramula
16	Ramban		6	Kupwara
17	Kulgam		7	Badgam
18	Shopian		8	Bandipora
19	Poonch		9	Kulgam
20	Rajouri		10	Shopian

Overall, while the preparation of DGGI have presented certain challenges, especially related to indicator selection and availability of data, there is no doubt that it has been successful in bringing out the assessment of the Districts. By making the DGGI an annual feature and a move towards sustainable data collection protocol, the base line data developed will assist in bridging the performance gaps while keeping the real-time check on the quality and authenticity and outreach of governance to the citizens.

DGGI of J&K is unique and first of its kind. The design and scope of the Index could be further expanded by including District/Division specific additional indicators. The DGGI may further be strengthened to include a lot more dimensions including input and perception-based parameters.

The DARPG, Govt. of India is guiding and providing financial support for the exercise. CGG, Hyderabad is roped in for extending technical support. The J&K Institute of Management for Public Administration and Rural Development (IMPARD) with active collaboration of Directorate of Economics and Statistics (DES), Govt. of J&K are playing a pivotal role in developing this index.

Introduction

1.1 Background

India is transforming and embracing change both in policy and economic outlook faster than other comparable nations. The outcome of several reforms over the past two and half decades has shown a remarkable transformation of India from a largely closed and listless economy to an open and thriving economy. The country's progress is not only qualitative but measurable as well. With economic data projecting India to be one of the fastest growing economies and reaching the horizon of being the second biggest economy by 2030, faster than imagined, there are definitive indices that measure and give the assessment of India's economic growth and potential. It is argued that it has clear linkage with the adopted governance model.

Indian Union is based on the principles of federalism and demonstrates a significant decentralisation of power between the Central and State Governments based on the jurisdiction provided by the Indian Constitution. With present government's approach of 'Minimum Government but Maximum Governance', the idea of governance is pushed forward. The Central Government wants the State Governments to lead India's success story by giving them more autonomy in terms of fiscal independence and devolving more powers. For a State Government to be successful in meeting the aspirations of its citizens, it is very important that all the Districts start achieving various objectives and attain the

expected outputs and outcomes. Therefore, it is high time for an overall assessment of how well the governance mechanism at the District-level has delivered output as well as outcomes.

1.2 Good Governance Index

Good governance can be referred as an effective and efficient process of decision-making and the process by which decisions are made (or not made) for implementation keeping the amelioration of citizen as the top most priority. Resource allocation, creation of formal establishments with necessary sustenance and autonomy, setting up rules and regulations etc., are part of achieving this goal.

Good Governance Index

A comprehensive and implementable framework to assess the state of governance in all States and UTs which enables ranking of States/Districts and present a comparative picture.

The purpose behind developing a comprehensive index, termed as Good Governance Index (GGI), is to create a tool which can be used uniformly across the States, and eventually District-level, to assess the status of governance and impact of various interventions taken up by Central and State Governments and Union Territories (UTs) Administrations.

Based on the recommendation of Sectoral Group of Secretaries (SGoS) – 9 on Governance, the Dept. of Administrative Reforms and Public Grievances (DARPG),

Govt. of India has developed the GGI with technical support of Centre for Good Governance (CGG), Hyderabad. The GGI 2021 was published on the occasion of Good Governance Day on 25 December 2021 by the Hon'ble Home Minister & Minister for Cooperation Shri Amit Shah and Hon'ble Minister of State Dr. Jitendra Singh, Ministry of Personnel, Public Grievances and Pensions, Govt. of India. First edition of GGI 2019 was published on 25 December 2019.

GGI was developed to provide useful information for the States and Districts as well as Central Ministries/Departments concerned, enabling them to formulate

and implement suitable strategies for improving living standards of the citizen. It is envisaged that the results would lead to healthy and more informed policy discussions between different tiers of Governments. Such assessment provides a comparative picture among the States and Districts while developing a competitive spirit for improvement. In this context, the outputs and outcomes of various decisions, policy measures, initiatives, etc., become an important factor for assessment. GGI provided the impetus to design and develop a District-level governance index. Jammu & Kashmir Administration took the initiative to move forward in the endeavour.

1.3 Need for District Good Governance Index (DGGI)

Districts being a basic unit of field administration performing various functions, inter alia, regulatory functions such as law and order, land revenue / reforms, excise, registration, treasury, civil supplies and social welfare; coordinating and monitoring District / Sub-district level offices of the line departments of the State Government and their agencies like irrigation, health, Public Works Department (PWD), industries; etc., and supervising the local bodies (Panchayati Raj Institutions (PRIs) and Urban Local Bodies (ULBs) and other authorities) measuring their performance becomes important for proper assessment and planning which will lead to the development of the Districts and region as a whole.

Thus, the quality of governance mechanism (success and/or failures) at District-level can be judged only by how well District Administration functions and delivers the outcomes expected from them. In addition, there is a fair degree of agreement on the importance of certain essential dimensions or features of good governance like transparency, accountability, public participation, absence of corruption, etc., are prominent among them.

Though all the Districts are part of the State, they vary in size, economic status, social and cultural features, topography and other characteristics. Districts are governed by the same set of rules and regulations of State Government / UT Administration and

have almost similar public institutions and follow common administrative practices for the most part. Despite this, some Districts perform well in achieving various outcomes and some struggles. This gap in performance needs to be assessed properly so that the Districts can measure themselves and work on improvement of their lagging areas.

Therefore, there is a need to develop a comprehensive District Good Governance Index (DGGI) which encompasses administrative, economic, social, environmental, legal/judicial and other essential criteria. Further, it is proposed to include areas/targets, which India needs to achieve as signatory of Sustainable Development Goals (SDGs) of United Nations, for assessment purpose. The proposed DGGI would not only present a comparative picture but could yield valuable District-wise insights into their strong and weak areas of performance, and help in generating performance improvement mechanism.

1.4 DGGI for Jammu & Kashmir

All the State and UTs are governed as per the provisions of our Constitution. However, each State / UT has some distinct feature of administration – be it number and nomenclature of Departments, responsibilities assigned to the Departments, nomenclature of Head of the Departments (HoDs), etc. Irrespective of their respective uniqueness, the prime responsibility of the Government / District Administration is to fulfil the aspiration of its citizens and provide them with efficient and quality services at

affordable cost. In this context, developing DGGI could be an important step for improving the service levels in each of the Districts by assessing their performance. Assessing and ranking the Districts on their performance based on key indicators will lead to improvement in service levels.

The objective is to develop a comprehensive, measurable and implementable DGGI encompassing administrative, economic, social, environmental, legal/judicial and other essential criteria to assess the status of governance mechanism at District-level based on which Districts will be ranked and present a comparative picture for prompt actions.

DGGI of J&K will be an assessment tool presenting the status, both general and detailed, of the state of governance across the 20 Districts (Jammu and Kashmir Divisions having 10 Districts each). DGGI

Framework is a set of carefully selected key governance sectors with identified parameters of assessment based on well defined as well as measurable indicators that best capture different dimensions of the quality of governance.

The DARPG, Govt. of India is guiding and providing financial support for the exercise. CGG, Hyderabad is roped in for extending technical support. The J&K Institute of Management for Public Administration and Rural Development (IMPARD) with active collaboration of Directorate of Economics and Statistics (DES), Govt. of J&K are playing a pivotal role in developing this index.

The present DGGI Framework of J&K, includes 58 indicators in ten sectors. following a rigorous and robust process of data collection, screening and validation by each of the Districts, the data used for computing the index has been finalised.

2

Approach & Methodology

2.1 Approaches for Developing DGGI

The following approaches are incorporated as part of design and development methodology to ensure successful accomplishment of DGGI of J&K.

● Consultative Approach

The development of DGGI of J&K has followed a consultative approach. There were seven rounds of extensive consultations with the Secretary, DARPG, Govt. of India and Director General of J&K IMPARD and senior colleagues of the institute. Director General and senior officials of DES, Govt. of J&K have contributed significantly during these consultations. Deputy Commissioners (DCs) of Districts were consulted particularly for sectors and indicators finalisation.

Secretaries and Head of Departments (HoDs) of line Departments, Governance Experts, Sr. Officers involved in governance / administrative reforms, etc., were also consulted. The Chief Secretary to Government of J&K gave very valuable

inputs during the consultative meetings for indicator finalisation and implementation strategy of DGGI.

Table 1: DGGI Finalisation Progression

	Initial Draft	2nd Draft	Final Framework
Governance Sectors (Nos.)	20	10	10
Governance Indicators (Nos.)	116	72	58

● 'Broad-to-Specific' Approach

Broad-to-Specific approach is followed in designing the DGGI Framework. Major Themes/Sectors that encompass the entire governance spectrum are identified first and then these major sectors are divided into several measurable Indicators. Accordingly, the data items that facilitate measurement of these indicators and also related measurement mechanisms are identified. This approach establishes a trenchant and logical correlation among the Sectors, Indicators and Data Items and provides a rational drill-down.

Figure 1: Design of DGGI

● 360-Degree Approach

While identifying the major Sectors and Indicators, all possible dimensions are considered and brainstormed during above-mentioned consultations so that the entire spectrum can be covered. After considering all possible aspects, the most critical aspects are finalised for identification of major Sectors and Indicators.

● End-to-End Approach

It is attempted to make DGGI Framework as comprehensive as possible so as to provide an end-to-end system. It does not stop with mere identification of major Sectors and Indicators but continues till the end of the process by specifying the Data Items Required, Measurement Criteria, Data Sources and Measurement Mechanisms etc.

● Take-off from Existing Models

The developed DGGI Framework takes sufficient knowledge from the existing models of Governance Indices, takes off from there and attempts to increase horizontal and vertical coverage. This approach saves the project from re-inventing the wheel and saves effort and time. For the purpose, detailed discussions with senior officials of Govt. of Himachal Pradesh has been undertaken which has published its own Index for measuring the performance of Districts in the State.

● Pragmatic Approach

Even though the entire spectrum of governance is considered for brainstorming, only the most critical aspects are finalised, where pragmatic measurement is possible. In cases where required data is not available presently, a practical measurement mechanism will be suggested through which data can be generated.

2.2 Principles of Selection of Governance Indicators

The above-mentioned approaches assisted in identification of broad spectrum / sectors for index. The selection of measurable aspects under each sector is broadly driven by the data availability. During the consultations, it was observed that the existing data has some limitations in terms of providing a comprehensive picture. In some cases, the data does not cover all Districts and limited to sample Districts, population, etc. Sometimes data is not available on a yearly basis and some indicators do not reflect a time-series data. The significance of ready data availability through Departments of Govt. of J&K and office of DCs is premised on the fact that the DGGI should be implementable without having to depend on primary data collection through primary surveys. The secondary data compiled from above-mentioned sources is authentic reliable and accounted for, leading to easy roll-out of the index.

Therefore, with this context, the following principles governed in finalising the indicators:

- **Simple and measurable:** Easy to understand and calculate; should not include more than two to three data-points as numerator / denominator.
- **Output and outcome-oriented:** Citizen's requirements from governments in terms of actual services delivered.
- **Applicability across the Districts:** Applicable to all Districts; not favouring one or a set of Districts and availability of dataset covering all the Districts.
- **Controlled by the District Administration:** Effecting the performance / status change should be under the purview / authority of District Administration.

Figure 2: Indicator Selection Principles

In addition to the main principles followed for selecting the indicators, mandate of line Departments of Govt. of J&K, latest District-level data availability with DES, Govt. of J&K and linking outputs of ongoing flagship programmes and missions are also considered.

2.3 Data Source

For the purpose of data collection, the DGGI is heavily dependent on the data already

available with DES, Govt. of J&K. The DES, Govt. of J&K regularly publishes statistical publications with regard to various important social and economic aspects.

In addition, data was compiled from existing sources of line departments as well as District-level offices of line Departments concerned. These secondary sources included annual reports, statistical reports, Management Information System (MIS), factsheets, etc.

2.4 Components of Good Governance Index Framework

The developed DGGI Framework includes:

Figure 3: Components of DGGI

Based on the inputs received during the consultations With detailed deliberations through an iterative process with various stakeholders, 58 indicators clubbed as part of 10 sectors are finalised for inclusion as part of DGGI of J&K. However, some critical and important indicators, which were suggested during consultations could not be included as part of present framework due to various factors such as limitations and unavailability across all Districts.

Table-2: DGGI Sectors and Indicators

#	Sectors	No. of Indicators
1	Agriculture & Allied	11
2	Industry & Commerce	05
3	Human Resource Development	09
4	Public Health	09
5	Public Infrastructure & Utilities	06
6	Social Welfare & Development	06

7	Financial Inclusion	03
8	Judiciary & Public Safety	04
9	Environment	02
10	Citizen Governance Centric	03
Total		58

It is envisaged that the DGGI in its future iterations will have higher number of indicators which will not only be division specific but will also help in differentiating the growth paradox between the divisions. Given time and timely data collection capabilities, both input and process driven indicators can be included in the future iterations of DGGI. If such indicators are to be included, the framework of data collection templates for both input and process indicators as well as perception driven indicators need to be modelled on GGI 2021 brought out by DARPG, GoI.

Additionally, DGGI also provides opportunity to the DES and UT Administration to streamline periodic data collection, updation and publishing in their annual J&K Digest of Statistics. When this exercise is streamlined, a dynamic and real-time DGGI could be designed with a dashboard as user interface for the senior executive officials to track the performance of Districts. Going further, scheme specific data and its progress in implementation by the Districts could be planned as by-product of DGGI exercise.

2.5 Methodology for Computation of Ranks

This section provides details about data capture from various sources of data and the process to be followed for calculating sector and indicator-wise scores for final ranking of the Districts. The DGGI consists of a limited set of relevant indicators categorised in 10 sectors. The process of ranking is to be completed by following the below mentioned four steps:

Step I: Compilation of Necessary Data/Information

Calculation of the 58 different indicators under 10 sectors prescribed in the DGGI Framework requires data on a large number of facets covering various aspects of governance at District-level. To begin with, the index implementing agency needs to fix the reference year for ranking the Districts for data compilation purpose. Particularly, for Growth-based indicators, data has to be compiled for three (at least) or five years (to be decided based on the data availability) preceding the reference year. However, the index implementing agency has to keep scope for making exceptions as far as reference year is concerned for some indicators due to unavailability of latest data-sets.

As mentioned before, criteria of selection of indicators, inter-alia, is the availability of time-series data (invariably necessary for Growth-based indicators) with the line Departments of Govt. of J&K and DES,

Govt. of J&K. These secondary sources include annual reports, statistical reports, MIS, factsheets, etc. For indicators which are based on population (or total number of households), it is decided to use the latest data available, which is based on recent estimation / survey / study with the line Departments concerned. Otherwise data from Census of India 2011 should be considered.

There is a possibility that such centralised data may not be available for some indicators from these sources, in such cases data also needs to be compiled from District-level reports, Gazettes, etc., published by Districts which are already available in public domain. However, such data will be validated by the Departments concerned or DES, Govt. of J&K.

The raw data collected as part of this step should be aggregated through an MIS database allowing year-on-year comparisons and District-wise documentation of progress. Such data collection should be a periodic exercise tframework for ensuring reliable and regular data collection for all indicators across the Districts.

Step II: Normalisation of Indicator Values

Statistically, there is no sanity in comparing variables which are expressed in different units. Therefore, it is required to convert the variables with mixed scales into dimensionless entities, so that they can be compared and used for ranking purpose

easily. This way of conversion is known as normalisation. It helps in measuring and comparing composite indicators with ease. It also makes the aggregation of indicators meaningful. There are various methods available to normalise variables and attain scores for the Districts based on their performance on the 58 indicators and compiling them sector-wise. For the purpose of ranking the Districts as part of DGGI, the Dimensional Index Methodology is proposed to be used.

Dimensional Index Method is most commonly used for normalisation of values and subsequent ranking. In this method, the normalised value of each indicator is obtained by subtracting the minimum

value among the set from the raw value of indicators and then dividing it by the data range (maximum – minimum value). The maximum and minimum values for each indicator are ascertained based on the raw values for that indicator across the Districts – combining all Districts without considering the existing Divisional (Jammu and Kashmir Divisions) categorisation. This approach is specifically adopted so that such calculation would permit comparison across all Districts and can also be used for generating overall ranks – without considering the categorisation.

The following two equations be used to normalise the indicator values:

Dimensional Score for Positive Indicators:

$$\text{Score} = (\text{Indicator Value} - \text{Minimum Value}) / (\text{Maximum Value} - \text{Minimum Value})$$

Dimensional Score for Negative Indicators:

$$\text{Score} = (\text{Maximum Value} - \text{Indicator Value}) / (\text{Maximum Value} - \text{Minimum Value})$$

Where:

Positive Indicator = for which Higher Value is better

Negative Indicator = for which Lower Value is better

Indicator Value = Available through Secondary Sources

Maximum Value = Highest Indicator Value among the Districts

Minimum Value = Lowest Indicator Value among the Districts

The above-mentioned equations would be directly used by taking the values of indicators for reference year. In case of the Growth-based indicators, this exercise would be undertaken after calculating Compound Annual Growth Rate (CAGR) over base year to reference year for each

indicator. The following equation be used for calculating CAGR:

$$\text{CAGR} = (\text{Value of Reference Year} / \text{Value of Base Year})^{(1/n) - 1} \times 100$$

Where:

n = number of periods

Step III: Assigning Weightages

- **Equal Weightage to Sectors:** As mentioned earlier, while conceptualising DGGI, various aspects of governance, which are critical for growth, development and inclusiveness need to be measured, have been clustered under ten sectors. All the identified ten sectors are facets of equal importance from the point of view of citizen-centric approach for such comprehensive index at District-level.

In addition, there is a possibility that during a particular period, one District might be more focused and channelising its resources towards some limited prioritised sectors due to issues of regional importance. And, at the same time, there is a possibility that one District might be giving equal importance to all sectors at once allocating resources equally/proportionately. In such scenarios, there would definitely be a difference in outcomes achieved by either of the Districts. In such circumstances, the index should not provide any advantage or disadvantage to Districts for ranking purpose. Therefore, it is decided to give equal weightage to all sectors irrespective of the approach followed for ranking. The same has been discussed and approved by all the stakeholders during the consultations.

- **Differential Weightages for Indicators:** As already mentioned that outcome

/ output-based indicators were given priority for indicator selection and at the same time selection was restricted due to availability of data. Therefore, the outcome / output-based indicators are assigned higher weightage whereas proxy indicators (input/process-based) are assigned lower weightage. Assigning higher weightages to outcome/output-based indicators brings the focus on performance and achievements of the Districts. While assigning weightages citizen-centricity is remained at the core, however, still assigning weightages is a highly subjective and debatable. In arriving at the weights, care is taken to be rational and the weights are derived from extensive reading/study of the available research in the sectors. In addition, attempts have been made to arrive at a consensus on assigned weightages during consultative meetings.

By no means the assigned/suggested weights are final. At any given point of implementation, Govt. of J&K in consultation with DARPG, Govt. of India or the respective line Departments could intervene to change the weights as per the need/requirement/focus. Revising the assigned weightage would certainly become necessity, whenever the index implementing agency decides to include additional indicators or exclusion of indicators from the existing list.

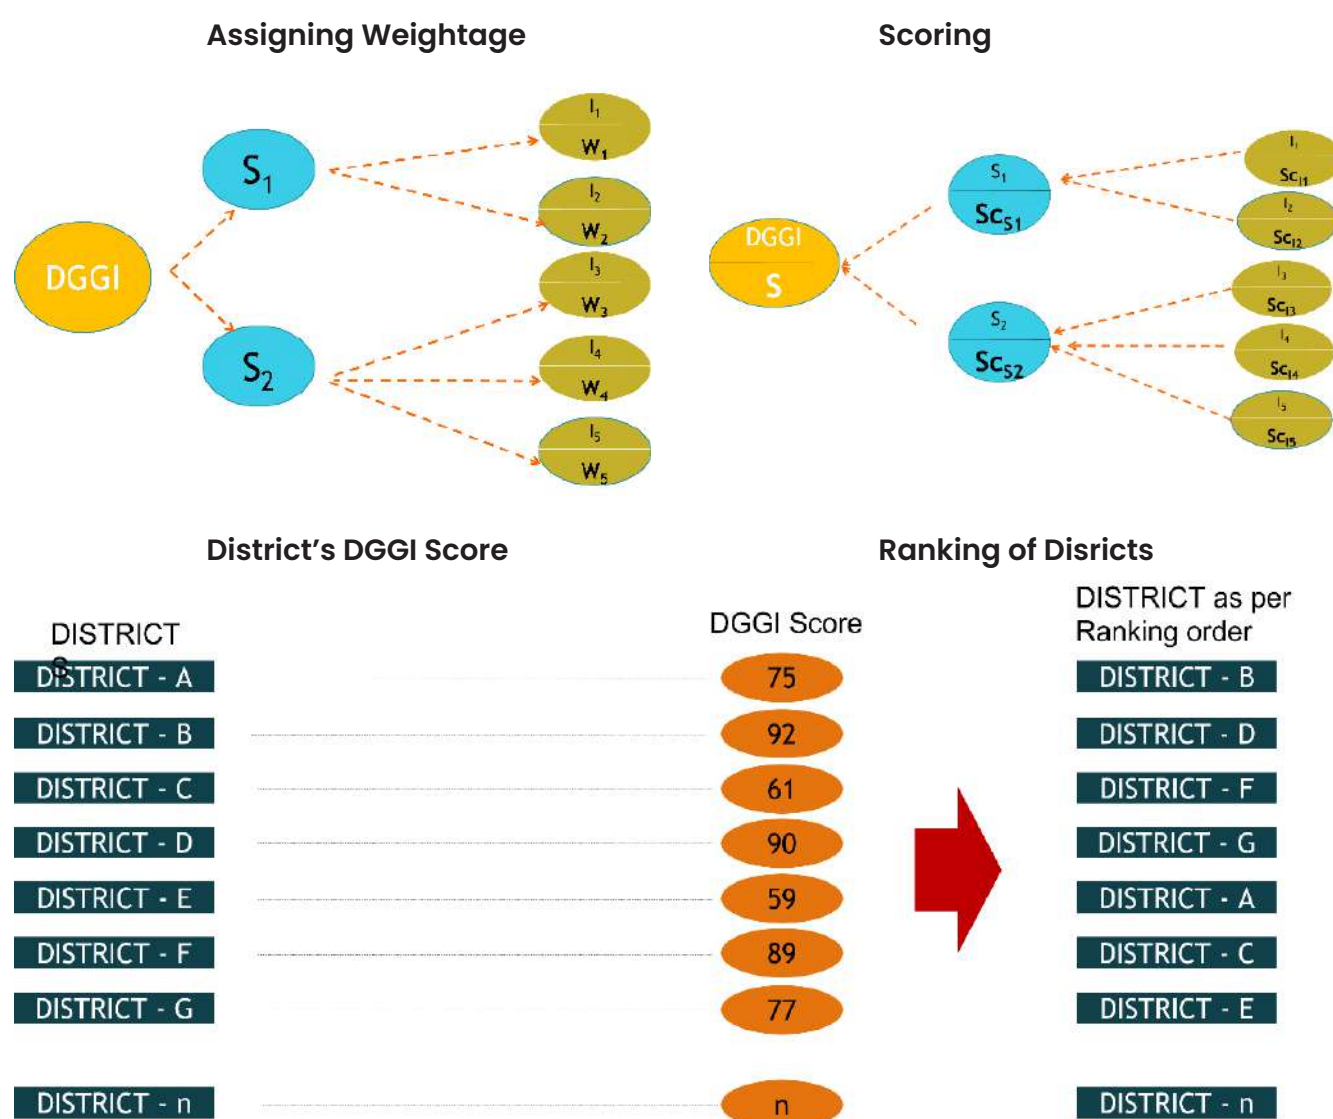

Step IV: Computation of Scores and Ranking

After completing data normalisation process, the normalised value of each indicator needs to be multiplied with weightage assigned to the indicator in order to obtain the final indicator score. These final individual indicator scores are aggregated to obtain a value for the sector. These aggregated values after multiplication with sector weight becomes

the score for the sector and once sector-wise scores are aggregated, it becomes District's DGGI score to be used for ranking purpose.

By following the above-mentioned methodology, the index implementing agency can rank all the Districts without any categorisation to assess the standing of a District in comparison to other Districts (as explained in Step II).

Sectors and Indicators of DGGI of J&K

3.1 Sectors of DGGI of J & K

A brief description of Sectors which are included as part of DGGI Framework for J&K is provided below:

- **Agriculture & Allied Sectors**

In Agriculture and allied sector, eleven indicators have been identified with a focus on output and institutional support like crop insurance, animal vaccination, etc. This is a primary sector and by nature is dependent on large external factors such as topography; agro-climatic zones; rainfall; traditional cropping pattern; soil, etc. In order to maintain parity and have a sense of commonality, attempt is made to aggregate the production by way of including generic indicators such as growth rate; food grains production, etc.

- **Commerce & Industry**

Central and State Governments are coming up with a number of schemes for the development of commerce and industries to, *inter-alia*, boost the economy, Gross State Domestic Product (GSDP) and employment. Govt. of J&K is continuously making efforts to improve Ease-of-Doing-Business (EoDB) and achieving higher scores. Most of the indicators for this particular sector are calculated at UT-level, therefore, for the purpose of DGGI some proxy indicators such as establishment registered for Good and Service Tax (GST), Micro, Small and Medium Enterprises (MSME) establishments, etc., are included. Tourism being an important economic and commercial activity of

J&K's, an indicator pertaining to number of tourist is being included. Combinedly, these indicators would reflect the achievement of a particular District for promoting economic activities in the District. To overcome decades old perception of not industry friendly State (earlier), it is critical that the recent heightened interventions of attracting good number of diverse industries needs to be measured. Including indicators like growth in GST registered establishments, MSMEs are an effort towards above stated objective.

- **Human Resource Development**

Inclusive development hinges upon ensuring quality education. Proper schooling prepares individuals for social and civic responsibility, builds social capital and encourages effective cognitive development. Quality school education is a function of a targeted focus on learning outcomes, efficient governance structures, provision of necessary infrastructure and ensuring equitable academic opportunities. Thus, as part of this sector, indicators like enrolment ratio, gender parity and skill trainings are included. Skill development indicator is included to measure the readiness of the UT to meet the skilled labour requirements.

- **Public Health**

Public Health is one of the priority areas for development. Under this sector, nine key indicators are identified looking at the outcomes like Maternal Mortality

Ratio (MMR), Infant Mortality Rate (IMR), immunisation achievement, etc. While J&K in general is above performing UT in terms of Health parameters such as MMR and IMR. Measuring the performance of these critical indicators and comparing between the Districts provides opportunity to design targeted intervention in lagging Districts. Overall operationalisation and resources availability are also captured through indicator such as Health and Wellness (HWCs), Anganwadis with own buildings, etc. Similarly, other indicators in this sector are outcome of available infrastructure, right policies and streamlined processes.

● **Public Infrastructure & Utilities**

The basic infrastructure and utility services like water, sanitation, road connectivity and power supplies which are priority areas are captured in this sector with the help of six indicators. The indicators include access to housing, water, road connectivity and access to and availability of power supply.

● **Social Welfare & Development**

In social welfare and development sector, six indicators have been identified attempting to cover the overall gamut of the welfare and development arena. This sector covers the areas like social protection, Public Distribution System (PDS) for foodgrains, employment, empowerment of poor, etc.

● **Financial Inclusion**

Financial inclusion refers to providing greater access to financial services for poor and low-income individuals, as well as

businesses with limited resources. Financial inclusion initiatives help boost the local economy. The financial inclusion of poor and marginalised is assessed through various indicators included under this sector.

● **Judicial & Public Safety**

The judicial and public Safety sector is critical as it reflects upon law and order situation and looks into efficiency of judicial processes, matters related to police, criminal justice, public safety, etc. Four indicators are selected in this sector which include conviction rate, incidences of crime against women and children, etc.

● **Environment**

Realising the criticality of environmental sustainability for sustainable development, environment has been taken as a separate sector. As depleting forest area is a main area of concern, the change in forest area has been included as an indicator in the sector. Indicator selection under this sector was particularly constrained due to limited availability of homogeneous data/information across the Districts. However, a beginning has been made through DGGI Framework, which would be built-upon in subsequent editions of the Index.

● **Citizen Centric Governance**

The expectation of the citizen in terms of more transparent, accessible, and responsive services from the public sector is increasing. In response, Government is also making efforts to improve service delivery through use of information technology,

online portals, use of mobile applications, etc. The citizen centric governance sector has included indicator to capture the same.

3.2 Sector-wise List of Indicators

A sector-wise list of indicators with required data-items to calculate the indicator value is provided below:

Table 3: List of Sector-wise Indicators with Weightages

#	Sectors	#	Indicators	Weights	Data Items Required
1.	Agriculture & Allied Sector	1.	Growth of Production of Food Grains	0.2	Total food grains production of reference year
					Total food grains production of reference year - 1
					Total food grains production of reference year - 2
		2.	Growth in Production of Major Horticulture Produce	0.2	Total horticulture production of reference year
					Total horticulture production of reference year - 1
					Total horticulture production of reference year - 2
		3.	Growth in Milk Production	0.05	Total milk production of reference year
					Total milk production of reference year - 1
					Total milk production of reference year - 2
		4.	Growth in Meat Production	0.05	Total meat production of reference year
					Total meat production of reference year - 1
					Total meat production of reference year - 2
		5.	Growth in Poultry Production	0.05	Total poultry production of reference year
					Total poultry production of reference year - 1
					Total poultry production of reference year - 2

#	Sectors	#	Indicators	Weights	Data Items Required
		6.	Percentage of Mandis Linked to e-Mandis (e-NAM)	0.1	Total number of Mandis linked to e-Mandis (e-NAM) till reference year
					Total number of Mandis in reference year
		7.	Crop Insurance	0.05	Total area sown in the reference year (Rabi + Kharif)
					Total area insured out of total area sown in the reference year (Rabi + Kharif)
		8.	Percentage Increase in Agricultural Credit	0.05	Total amount of agriculture credit provided in reference year
					Total amount of agriculture credit provided in reference year - 1
		9.	Percentage of Kisan Credit Card (KCC) Issued	0.1	Total number of eligible farmers for KCC
					Total number of KCC issues to farmers
		10.	Percentage of Soil Health Card (SHC) Distributed	0.1	Total number of SHC to be Distributed (Target) in reference year
					Total number of SHC Distributed (Achievement) in reference year
		11.	% of Animals Vaccinated	0.05	Total number of animals eligible for vaccination
					Total number of animals vaccinated

#	Sectors	#	Indicators	Weights	Data Items Required
2.	Commerce & Industry (including Tourism)	12.	Increase in No. of Establishments Registered under GST	0.2	Number of Establishment registered under GST in reference year
					Number of Establishment registered under GST in reference year - 1
		13.	Percentage Change in No. of MSME Units Registered under Online Udyog Aadhar Registration	0.2	Number of MSME Units Registered under ODM + OEM-1 + OEM-2 in reference year
					Number of MSME Units Registered under ODM + OEM-1 + OEM-2 in reference year - 1
		14.	Percentage Increase in credit to handicrafts and allied sectors	0.3	Credit provided to handicrafts and allied sectors in reference year
					Credit provided to handicrafts and allied sectors in reference year - 1
		15.	Increase in credit for self-employment	0.15	Credit provided for self-employment in reference year
					Credit provided for self-employment in reference year - 1
		16.	Increase in Tourist Footfall	0.15	Number of tourists visited in reference year
					Number of tourists visited in reference year - 1
3.	Human Resource Development	17.	Gender Parity Index at Secondary Level	0.1	Directly Calculated figure
		18.	Retention rate at Secondary Level	0.25	Directly Calculated figure
		19.	Enrolment Ratio of SC	0.05	Directly Calculated figure
		20.	Enrolment Ratio of ST	0.05	Directly Calculated figure
		21.	Pupil Teacher Ratio (RTE Specified)	0.15	Directly Calculated figure

#	Sectors	#	Indicators	Weights	Data Items Required
		22.	Percentage of Schools with Drinking Water, Separate Toilet and Electricity Facilities	0.2	Total number of government schools (including Government Aided) having all three facilities (drinking water + separate toilets + electricity) in reference year
					Total number of government schools (including Government Aided) in reference year
		23.	Percentage of Schools with Access to Computers	0.05	Total number of schools with access to computer in reference year
					Total number of schools in reference year
		24.	No. of Children served Mid-Day Meals	0.1	Number of children served mid-day meals in reference year
					Total number of eligible children for mid-day meals / number of student enrolled in schools
		25.	Skill Trainings Imparted to Students	0.05	Target allocated (persons) in reference year
					Training done (persons) in reference year
4.	Public Health	26.	IMR per 1000 live births	0.1	Directly Calculated figure
		27.	MMR per 1000 live births	0.1	Directly Calculated figure
		28.	Full Immunisation	0.1	Achievement - total number of children vaccinated
					Target - total number of children eligible for vaccination
		29.	Percentage of Institutional Delivery	0.2	Total number of institutional deliveries in reference year
					Total number of estimated deliveries in reference year
		30.	Percentage of Sub-centers / PHCs converted into Health & Wellness Centers (HWCs)	0.1	Total number of sub-centers/ PHCs converted into HWCs

#	Sectors	#	Indicators	Weights	Data Items Required
		31.	Proportion of Anganwadis with own buildings	0.05	Total number of sub-centers/ PHCs
					Total number of Anganwadis
					Number of Anganwadis with own buildings
		32.	Percentage of Pregnant Woman Received 4 or More Complete ANC check-ups + TT2/Booster + 180 IFA	0.05	Total number of pregnant women received 4 or more complete ANC check-ups + TT2/Booster + 180 IFA in reference year
					Total number of pregnant women registered in reference year
		33.	Proportion of Functional FRUs (First Referral Units) against the norm of 1 per 500,000 Population (1 per 300,000 in hilly areas)	0.05	Number of functional FRUs operational
					Number of sanctioned FRUs as per norms
		34.	Percentage of Golden Card Issued under ABPMJAY / SEHAT Scheme	0.25	Number of eligible beneficiaries for golden card under ABPMJAY / SEHAT Scheme
					Number of Golden card issued
5.	Public Infrastructure & Utilities	35.	Housing for All under PMAY Urban and PMAY Grameen	0.3	Total number of houses constructed/grounded out of sanctioned for construction PMAY (Grameen)
					Total number of houses constructed/grounded out of sanctioned for construction - PMAY (Urban)
					Total number of houses sanctioned for construction - PMAY (Grameen)
					Total number of houses sanctioned for construction - PMAY (Urban)

#	Sectors	#	Indicators	Weights	Data Items Required
		36.	Percentage of Households with Access to Safe Drinking Water	0.2	Total number of HHs having access to water supply connection within premise from treated source- Rural + Urban
					Total number of Households (HHs) - Rural + Urban
		37.	Percentage of Households with Improved Sanitation Facility	0.2	Total number of HHs having access to sanitation - Rural + Urban
					Total number of HHs (Rural + Urban)
		38.	Percentage of Households Electrified to Total Households	0.1	Total number of households electrified
					Total number of households
		39.	Cumulative number of Kms of all-weather Road Work Completed as a Percentage of Total Sanctioned Kms in the District under PMGSY	0.1	Total length of all-weather road work sanctioned in the district under PMGSY
					Total length of all-weather road work completed in the district under PMGSY
		40.	Percentage Increase in Black Top Roads as Percentage of Total Roads	0.1	Total length of black top roads in reference year
					Total length of all roads in reference year
6.	Social Welfare & Development	41.	% of Aadhaar seeded Ration Cards	0.25	Total number of Aadhaar seeded Ration Cards
					Total number of Ration Cards
		42.	Off-take of Grains	0.25	Total quantity of grain lifted out of sanctioned quantity under TPDS and SSS in reference year
					Total quantity of grain sanctioned for lifting under TPDS and SSS for reference year
		43.	Average Days of Employment provided per household under MGNREGA	0.1	Total number of person-days as employment provided in reference year

#	Sectors	#	Indicators	Weights	Data Items Required
					Total number of registered persons provided employment (worked) in reference year
		44.	Atal Pension Yojana: No. of Beneficiaries per 1 lakh population	0.2	Total number of beneficiaries covered under Atal Pension Yojana
					Total number of eligible beneficiaries
		45.	Number of Enrolments per 1 lakh population under – Pradhan Mantri Suraksha Bima Yojana (PMSBY) and Pradhan Mantri Jeevan Jyoti Bima Yojana (PMJJBY)	0.1	Total number of beneficiaries (PMSBY + PMJJBY)
					Total number of eligible beneficiaries
		46.	Percentage of Beneficiaries under NSAP and ISSS Scheme	0.1	Total number of beneficiaries under NSAP and ISSS Scheme
					Total number of eligible beneficiaries
7.	Financial Inclusion	47.	Financial Inclusion under Jan Dhan Yojana	0.35	Total number of bank accounts opened under Jan Dhan Yojana
					Total number of eligible beneficiaries
		48.	Total Disbursement of Mudra Loan per one lakh population	0.35	Total disbursement under Mudra Loan
					Total population of District
		49.	Total Disbursement (in Lakhs) on Self-employment Schemes	0.3	Total disbursement under self-employment
					Total population of District

#	Sectors	#	Indicators	Weights	Data Items Required
8.	Judiciary and Public Safety	50.	Number of Road Accidental Death per 1 lakh population	0.1	Total number of road accidents in reference year
					Total population of the District
		51.	Incidence of Crime against Women	0.25	Total number of registered crimes against women in reference year
					Total women population of the District
		52.	Incidence of Crime against Children	0.25	Total number of registered crimes against children in reference year
					Total children population of the District
		53.	Conviction Rate	0.4	Cases convicted in reference year
					Cases in which trials were completed in reference year
9.	Environment	54.	Change in Forest Cover	0.6	Total area under forest cover in reference year
					Total area under forest cover in reference year - 1
		55.	Water Bodies and Wetland Protection	0.4	Total number of water bodies protected
					Total number of water bodies
10.	Citizen Centric Governance	56.	Status of Grievance Redressal	0.3	Total number of grievances redressed in the reference year
					Total number of grievances registered in the reference year
		57.	Percentage of Govt. Services Provided to Citizens Online to total services as per Guarantee Act	0.35	Total number of Govt. services provided online
					Total number of Govt. services to be provided as per Guarantee Act
		58.	Percentage of Government offices converted to e-office	0.35	Total number of Government offices
					Total number of Government offices converted to e-office

4.1 Overall Ranking with Final Score

The DGGI is a tool which can be used to assess the status of governance and impact of various interventions taken up by the Districts and UT Administration. DGGI would provide a framework to assess the performance of the Districts in specific sectors and provide useful information to the Districts enabling them to formulate and implement suitable strategies to improve ease-of-living and service delivery. The ranking of the Districts would bring about healthy competition amongst Districts from which the citizens would be immensely benefitted.

The overall Ranking of the Districts are presented in the following sections. The ranking is based on the following ten sectors and computed by following the methodology described in Section 2.5 of Chapter 2.

- (i) Agriculture & Allied Sectors
- (ii) Commerce & Industries
- (iii) Human Resource Development
- (iv) Public Health
- (v) Public Infrastructure & Utilities
- (vi) Financial Inclusion
- (vii) Social Welfare & Development
- (viii) Judicial & Public Safety
- (ix) Environment

The Districts are scored and ranked based

on the data shared by the Directorate of Economics and Statistics, Govt. of Jammu & Kashmir.

The data obtained for different indicators are not in the same format/measurement units across sectors and hence it has been normalised by using Dimensional Index Method. Respective weightages are assigned to get the indicator score. These individual indicator scores are aggregated to obtain a value for the sector. And once the sector-wise scores are aggregated, it becomes District score to be used for ranking purpose.

As mentioned earlier, the DGGI framework assigns equal weightage to all sectors providing equal platform to all Districts. However, differential weightages are assigned for Indicators. The outcome / output-based indicators are assigned higher weightage whereas input/process-based indicators are assigned relatively lower weightage. In arriving at the weights, care is taken to be rationale and the weights are derived from extensive reading/study of the available research in the sectors. In addition, attempts have been made to arrive at a consensus on assigned weightages during consultative meetings. The assigned weightages for present scoring and ranking are given in Chapter 3.

It is important to note that if data is missing for a District for a particular indicator or the indicator is not applicable to a particular District/s, that indicator is discounted from

the score calculation of that District, and the indicator weight is re-allocated/re-distributed to the other indicators within the same sector for that District.

By no means the assigned/suggested weights are final. At any given point of implementation, the UT Administration can change the weights as per the need/requirement/focus.

In the following sections, Sector-wise ranks of the Districts is presented followed by composite District Good Governance Index ranking the Districts.

4.2 Sector-wise Ranking

The Sector-wise ranking is presented in the following section.

4.2.1 Agriculture & Allied Sector Ranking

J&K UT

Jammu Division

Rank	Ranking	Score	
1	Kishtwar	0.772	Kishtwar 0.772
2	Doda	0.657	Doda 0.657
3	Ramban	0.543	Ramban 0.543
4	Udhampur	0.532	Udhampur 0.532
5	Rajouri	0.521	Rajouri 0.521
6	Jammu	0.504	Jammu 0.504
7	Kathua	0.486	Kathua 0.486
8	Samba	0.485	Samba 0.485
9	Poonch	0.477	Poonch 0.477
10	Reasi	0.433	Reasi 0.433

Kashmir Division

Rank	Ranking	Score	
1	Srinagar	0.724	Srinagar 0.724
2	Pulwama	0.626	Pulwama 0.626
3	Badgam	0.525	Badgam 0.525
4	Kulgam	0.504	Kulgam 0.504
5	Anantnag	0.496	Anantnag 0.496
6	Ganderbal	0.489	Ganderbal 0.489
7	Bandipora	0.472	Bandipore 0.472
8	Baramula	0.467	Baramula 0.467
9	Kupwara	0.315	Kupwara 0.315
10	Shopian	0.310	Shopian 0.310

Note: Bandipore, Doda, Kishtwar, Poonch and Rajouri have not reported any Mandis in the District with regard to indicator for Mandis linked to e-NAM; therefore, indicator weightage has been equally distributed to other indicators.

Salient Features of Agriculture & Allied Sector

- **Growth of Food Grain Production** – Seven Districts have shown positive Cumulative Annual Growth Rate (CAGR) over Financial Year (FY) 2018-19 to FY 2020-21. **Kishtwar** District has registered the highest CAGR of 19.40%.
- **Growth of Horticulture Produce** – Seven District have shown positive CAGR over FY 2018-19 to FY 2020-21. **Pulwama** District has registered the highest CAGR of 8.95%.
- **Growth of Milk Production** – Total 17 Districts have shown improvement in terms of CAGR, while **Kishtwar** has registered a phenomenal CAGR of 117.86%.
- **Growth of Meat Production** – Out of total 20 Districts, 14 Districts have shown registered

positive CAGR over FY 2018-19 to FY 2020-21. **Kishtwar** District have registered the highest CAGR of 5.40%.

- **Growth of Poultry Production** – Total 14 Districts have shown positive trend while **Anantnag** District has registered the highest CAGR of 25.20% over FY 2018-19 to FY 2020-21.
- **Percentage of Mandis Linked to e-NAM** – It is being reported that Bandipora, Doda, Kishtwar, Poonch and Rajouri Districts does not have any Mandis. It is being reported that Jammu District has the highest number of Mandis (23) out of which only one is linked to e-NAM. Srinagar District has reported that two Mandis are linked to e-NAM out of the total five Mandis.
- **Crop Insurance** – For FY 2020-21 only two Districts namely **Poonch** and **Udhampur** have reported area under Crop Insurance.
- **Increase in Agriculture Credit** – Almost all the Districts have shown positive trend while 10 Districts have registered CAGR of more than 15% over FY 2018-19 to FY 2020-21. Poonch District has registered the highest CAGR of 43.15%.
- **Kisan Credit Card (KCC) Issued** – Total 13 Districts have distributed KCC to more than 75% of the farmers with **Reasi** with highest percentage of 98.88%.
- **Soil Health Card (SHC) Distributed** – Total 16 Districts have distributed more than 95% of SHC.
- **Animal Vaccination** – Total seven Districts have achieved the target by 100% and remaining are very close to the target.
